

Eclipse Photo Booth

UDC
www.udc.co.uk

The Eclipse photo booth has an amazing 12 ft. curved LED display surrounding the cabinet on both sides which plays videos, shows photos and can be used as a promotional tool for your business to advertise to customers.

Use the touch screen controls to choose the photo design you desire and pose for your photo taken on a super HD 10 Mega-pixel camera.

Photographs are printed via a high-quality Mitsubishi Dye Sublimation printer on 4x6" photo paper and include a special QR-Code that can be scanned using a freely available smart phone app, downloadable for both iOS and Android devices

The special QR-Photo code enables customers to share their pictures and videos online via social media using the revolutionary Internet cloud based system, where they remain available for up to six months. Connect your photo booth via Ethernet, Wi-fi or even mobile data. It's powerful and fully featured yet simple to use and manage.
